

Dear Electricity Consumers

Ceylon Electricity Board is always making every effort to provide quality, reliable and uninterrupted electricity supply throughout the Island. Due to present dry weather experienced in the country, energy demand has increased. The present electricity generation is mainly produced from all available Thermal Power Stations and Hydropower Plants. At present, hydro storage has depleted to very low levels. Due to depleted water levels in the hydro reservoirs, CEB has to restrict the electricity generation from hydropower plants to save the water for drinking and irrigation requirements, which is more vital at this stage. Therefore, CEB is compelled to manage the demand in order to ensure that the storage in the reservoirs will be maintained above minimum operating levels until next inter-monsoon period expected in late April 2019.

CEB is therefore reluctantly compelled to manage the system in such a way that the demand is always controllable to maximum generation so that a stable power system is maintained throughout the country until situation is normalized. The demand management will be carried out in Groups listed herewith. At this critical stage CEB kindly requests all the customers to switch off non-essential loads during this critical period that is between 0800 h to 2200 h so that CEB could minimize the demand curtailment.

CEB regrets the inconvenience caused to customers.

Further, information could be obtained from following call center numbers relevant to you.
